

JOB DESCRIPTION

Job title: IT Technical Manager

About ASV Global

We are a fast paced, rapidly expanding, world leading company, specialising in the design, build and operation of unmanned maritime vehicles. We operate in the Military, Energy and research sectors and build innovative, technologically advanced products to solve difficult problems. Our UK Headquarters, based on the water's edge just outside Portsmouth, Hampshire provides a perfect location for the development and testing of our products. It is also the UK base for our software and robotics development team – a small, highly motivated team of engineers. We solve the problems that others can't. Our success is due to the people we employ – if you're smart, adaptable, highly productive, a team player and relish the challenge that comes with solving difficult problems then ASV Global is for you.

Objectives:

ASV Global is looking for an exceptional IT Technical Manager to join our expanding team with an exceptional track record of problem solving and extensive experience of the management of a broad spectrum of IT systems.

We expect you to be the engineer that other people can count on and the one that people turn to when the going gets tough. You should attack every problem with enthusiasm and share the company's passion for delivery and customer satisfaction. In return you will get to work in an environment where no two days are the same and where your contribution makes a real difference.

You will be integral to the successful growth and development of the company and your role will include:

- Overall oversight, management and planning of ASV's IT infrastructure
- Working closely with employees in the UK, US and Brazil to resolve technical issues
- Maintain a secure IT environment against common threats
- Manage technical projects to improve and extend the infrastructure and respond to business needs
- Day-to-day maintenance and planning and undertaking scheduled maintenance and upgrades
- Commissioning and repairing IT equipment
- Ensuring the integrity of automated backups
- Input to budget planning

Relationships:

- a) Responsible to: Technical Director
- b) Liaison with: All ASV staff, sub-contractors, customers and suppliers

Location:

Portchester, Hampshire, UK

Key skills and experience:

You are expected to have the following experience, capabilities and interests;

- Substantial experience managing a Windows domain environment
- Experience with Windows DFS server management
- Management and administration of Office 365 and Azure AD
- Experience with VMWare EXSi and SAN storage arrays
- Excellent knowledge of networking, firewalls and switches, IPSec and SSL VPN, VoiP phones
- Ability to diagnose and fix hardware issues
- Ability to assess, maintain and improve IT security in line with industry standards
- Quickly diagnose and resolve problems with a determined attitude
- Forward thinking and a self-starter
- Well presented, motivated and practical
- Able to work flexible hours and to travel when required

The following attributes are desirable;

- Microsoft Certified Professional, CCIE, CCNA qualifications
- Experience with VEEAM and V-Centre
- Experience with MS SQL Server and Sage
- Experience with Amazon Web Services
- Experience with managing Linux (CentOS) servers
- Administration of web-based tools such as JIRA and Confluence
- Experience with automated commissioning and provisioning tools
- Experience with very large storage arrays and data management
- An interest in robotics and unmanned vehicles
